PRESS RELEASE

Ozone fiber running on TDF networks

Ozone and TDF sign a national framework agreement so that Ozone can market its packages via all TDF's fiber optic networks.

Ozone, a French Internet services provider, will eventually market its packages to 700,000-plus homes and businesses covered by TDF's fiber optic network. Since 2017, five French counties - namely Val-d'Oise, Les Yvelines, Indre-et-Loire, Loir-et-Cher and Maine-et-Loire - have placed their trust in TDF to roll out, operate and sell fiber optic networks and services in their sparsely populated areas, boosted by a far higher broadband speed than ADSL, yet priced the same. This deal is a tangible benefit arising from the digital development project aiming to bring ultra high-speed broadband to everyone and bridge the digital divide.

From July 2018, the first Val-d'Oise connected communities will be Bernes-sur-Oise, Bruyère-sur-Oise, Champagne-sur-Oise, Chaumontel, Hérouville, Luzarches and Méry-sur-Oise. Public meetings have been planned starting June.

Olivier Huart, TDF Group CEO, said: "We're thrilled to offer Ozone's packages in the counties we serve. As soon as our first plugs go live in July, Val-d'Oise's connected homes will be able to tap into ultra high-speed broadband services".

Christophe Valdeyron, Ozone CEO, said: "Our deal with TDF is the culmination of our two companies' teamwork to expand ultra high-speed broadband access in France while letting us market fiber to a million-plus homes."

Over 50,000 customers have already been won over by Ozone's fully flexible packages, which, depending on user needs, range from internet access only to a quadruple play package comprising landline, TV, VOD and cellphone.

Business packages

Since January 2018, Ozone markets secure and user-friendly packages to businesses. Christophe added: "Our new range for the self-employed, artisans, micro-businesses and local authorities, will be available on TDF's networks".

About Ozone

Ozone SAS, France-based IAP and wireless Internet leader, markets broadband services throughout France. Ozone is a subsidiary of NomoTech, a telecoms operator founded in 2003 that is French and global wireless networks market leader.

About TDF

As a transparent and impartial operator, TDF helps digital firms in mainland France and French overseas territories meet their strategic transmission goals. For radio and DTT broadcasting, mobile high-speed broadband coverage and rolling out optical fiber, TDF, market leader with 13,900 sites, brings customers in-depth operational expertise, a mix of unique and ground-breaking technology and an exceptionally widespread local presence. In an ever more connected world, over the last four decades or more TDF has enabled telecoms and media companies to connect the French regions and people everywhere and faster.
